

Judy Teal

Teal is well known as calm and creative. It's the combination of Green and Blue, which this color inherits their personalities as well. Teal blends blue's tranquil stability with green's optimism and healing properties. Teal is the color of restfulness and mental and spiritual balance. Brighter teal tones are unique and smart. Based on color research, people like me who like the color teal tend to be reliable, independent, creative, and have a good temper. However, I also tend to be prone to overthinking every situation. Teal perfectly describes my personalities and I was attracted into it immediately.
